YOUSSEF ELSHAMY

Business Analyst

Nasr City, Cairo, Egypt | +20 115 511 9930 | yosifshamy716@gmail.com

LinkedIn | Portfolio |

PROFESSIONAL SUMMARY

Business Analyst in management consulting with a Business Information Systems degree and Google Data Analytics certifications. Experienced in diagnosing organisational and commercial performance gaps, translating stakeholder needs into requirements, KPIs and phased roadmaps, and producing client-ready strategy deliverables for clients in agri-food and industrial automation. Backs recommendations with hands-on analysis in SQL, Power BI, Tableau, Python and Excel.

CORE COMPETENCIES

Business Analysis	Requirements Elicitation & Documentation, Gap Analysis, Current-State Assessment, Maturity Diagnostics, Process Mapping, SOP Design, Stakeholder Management
Strategy & Planning	SWOT Analysis, KPI & Target Definition, Sprint Roadmaps, Stage-Gate Planning, Go-to-Market Strategy, Risk Registers, Make-or-Buy Analysis
Data & BI	SQL (MySQL), Power BI (DAX, Power Query), Tableau, Excel, Python (Pandas, NumPy, Matplotlib, Seaborn), KPI Dashboards
Tools & Delivery	Executive Presentations, Requirements Documentation, Google Sheets, Jupyter Notebook, Git/GitHub
Languages	Arabic (Native), English (Professional)

PROFESSIONAL EXPERIENCE

Business Analyst **May 2026 – Present**

Industry 4.01 – Business Consulting & Training Services, Cairo, Egypt

- Gather and translate client requirements into structured analyses, gap assessments and recommendations.
- Run current-state and maturity diagnostics across business functions to locate root causes.
- Define KPIs, baselines and targets, and turn them into phased roadmaps with clear gate criteria.
- Prepare client-ready deliverables: diagnostic reports, process maps, SOP outlines and executive presentations.
- Standardise reporting templates and delivery steps to keep quality consistent across engagements.

Digital Banking Intern **Jul 2022 – Aug 2022**

Export Development Bank of Egypt (EBank), Cairo, Egypt

- Tested new e-banking web modules against business requirements and reported defects to developers.
- Supported requirement traceability across the SDLC alongside senior engineers.

CONSULTING PROJECTS

Organisational Maturity Restoration Strategy **2026**

Client: agri-food producer and exporter (confidential)

- Assessed organisational maturity across 10 business functions, set the baseline score and isolated HR as the keystone gap holding back every other function.
- Diagnosed the root cause as system weakness rather than capability weakness: results depended on the founder and on departing staff instead of documented processes.
- Structured a 36-week, five-sprint recovery programme (HR, Sales & BD, Sourcing, Quality & Food Safety, Make-or-Buy), sequenced by dependency and staggered to cut the timeline by 40%.
- Designed a repeatable 12-week sprint model (Diagnose, Solution, Implement, Reassess) with gate-based funding, so each sprint is re-scored before the next one is funded.
- Defined measurable gate criteria per sprint, covering function maturity scores, CRM adoption, receivables days, customer concentration limits and food-safety recall readiness.
- Specified five governance outputs for every sprint (policy, SOPs, Delegation of Authority, KPI control loop, risk register), projected to more than double the governance score.
- Built a utilisation-based make-or-buy decision matrix for support functions and an execution risk register with controls.

Digital Marketing & Growth Strategy 2026–2028 **2026**

Client: industrial automation and MEP solutions provider, Egypt & Saudi Arabia (confidential)

- Conducted internal and external situation analysis (strengths, gaps, opportunities, threats) for a firm serving food and beverage manufacturers.

- Identified the core problem as a gap between proven technical capability and digital visibility, with new business relying on one executive's personal network.
- Structured the strategy around three service pillars to move the firm from relationship-led sales to digital lead generation.
- Developed a three-sprint digital roadmap over 30, 90 and 180 days: specialised website, case-study video content, then targeted LinkedIn campaigns.
- Set the KPI framework across sales, marketing and operations, including a 5x revenue growth target by 2028, monthly content and engagement targets, and 100% on-time delivery.
- Authored the final recommendations, including a site-visit call-to-action, educational technical content and a machine-retrofit service package.

CERTIFICATIONS

Google Data Analytics Advanced Certificate – Google **Jul 2026**
Advanced Statistics, Advanced Python, Machine Learning, Interactive Data Visualization (7 courses)
